Subject: RE: GK Follow up

Matt,

There will be some comments and specifications to be added to this write up. Generally the approach is consistent with what we discussed, but some of the finish details are absent. In addition, there is the grade adjustment to the top of the dump and new drainage channel that will need to be made as the portal / adit opening is dropped to the floor of the adit.

So, I will get something sometime next week as best I can while I am in UT covering the Stone Castle job.
